

WELCOME TO FORTH VALLEY HOSPITALS

NHS Forth Valley Hospitals serve a population of approximately 300,000.

The new Forth Valley Royal Hospital (FVRH) opened in Larbert in July 2010. The majority of the functionality from Falkirk Community Hospital (FCH) was transferred to FVRH at that time as the phase one move was conducted. Phase two took place in September 2010 and phase three in July 2011 saw the transfer of Stirling Royal Infirmary into FVRH. Which has a 24/7 Emergency Department and all Medical Services apart from Cardiothoracic Surgery and Neurosurgery. It also has a Women & Childrens Department which includes neo-natal, paediatric and Obstetrics/Gynaecology Departments. A full range of diagnostic facilities is available on site including an MRI scanner. There are comprehensive Laboratory and Library facilities.

For further information on NHS Forth Valley follow the link to <http://www.nhsforthvalley.com>

Following the completion of the transition to FVRH the sites at Falkirk and Stirling are being redeveloped into community hospitals with a range of services.

The student accommodation remains at the Falkirk site.

The Department of Medicine comprises 9 wards and 184 beds in FVRH. This includes the Clinical Assessment Unit and Acute Assessment Unit for acute medical admissions which take in the majority of medical emergencies of all ages. There is a purpose built Cardiology Ward with 14 beds There is also a High Dependency Unit which is shared with Surgical Patients and a Critical Care Department which again caters for both medical and surgical patients. The Medical Directorate covers a broad range of medical conditions with an average of 60 emergency admissions daily. The special interests of the Directorate include Cardiology, Gastroenterology, Diabetes/Endocrinology, Respiratory, Haematology, Dermatology, Rheumatology, Acute Geriatric Medicine and Infectious Diseases. There are also Acute Physicians assessing and triaging admissions.

The Medical Directorate teaches Students from Edinburgh and Glasgow Universities. At any one time there may be 8 Medicine Students from Edinburgh University on attachment in their

final year and 5 from Glasgow University on attachment in either their fourth or third year. The Edinburgh Students are attached for 4 weeks, the third year Glasgow Students for 5 weeks and the fourth year Glasgow students for 10 weeks.

Your Lead Tutor for General Medicine, for Edinburgh Students is Dr Wood, Consultant Respiratory Physician and will be a contact for you throughout your time in Forth Valley and if there are any problems during your attachment please arrange to see him (contact his Secretary, Debbie Laing ext: 66826).

Learning Objectives:

Your learning objectives during the your attachment in Medicine are mapped out in the Learn medical curriculum. Not all the learning objectives will be covered by tutorials or lectures but are an indicator of the content that will be covered in that part of the course. You should use the objectives as a guide to your reading and the learning opportunities that are available in Forth Valley. In Year 6 there is a strong emphasis on preparation for the Foundation Years. Year 6 Students should be capable of assisting a Doctor in a clinic, ward, surgery or operating theatre and should become valued members of the Healthcare Team. It is an opportunity to consolidate the knowledge and competencies that have been gained in the previous 5 years.

The teaching will take the form of tutorials via Teams as well as CDF Led Bedside Teaching and ward based work. These sessions will be problem based either on topics such as prescribing, acid base disturbances, management of acute emergencies etc. or being patient centred around history and examination. You will also be tutored in being able to interpret investigations such as full blood count, U&Es, blood gases, ECG and chest x-rays. You will be expected to engage in performing all common practical procedures including venflons, venepunctures, arterial blood gases etc. If you are not able to do these procedures, please make sure that you are taught by a member of staff before attempting it on a patient. You will then be expected to become proficient in each of these techniques (this is important as when you are an FY1 you will often only be asked to do these techniques when other, non medical staff, have failed). You should also acquaint yourself with other procedures that you will need to inform patients about when you are qualified, by observing lumbar punctures, central line insertions, temporary pacing,

endoscopies, exercise tolerance tests, pulmonary function tests etc. During your attachment you will be assigned to your supervisor's team. The various wards are Ward B31 general medicine including respiratory, Ward B32 GI unit, Ward A12 general medicine Including Endocrine and Haematology, Ward A31 Infectious Diseases, CCU – coronary care unit – acute cardiac, HDU – acute medical problems and the cardiology ward.

You will be expected to attend medical out-patient clinics in relevant specialties . You will also be able to attend FY1 and FY2 teaching sessions via teams.

At the end of your attachment we expect you to be proficient in history taking and examination in all systems of medicine. To have clinical skills in common practical procedures and the ability to devise a management plan for all common medical conditions. You should be able to interpret common ECG abnormalities, chest x-rays, electrolytes and acid based disorders. You should know how to complete a death certificate, cremation form and how to retrieve information from the Laboratory in the hospital computer system. You should learn how to prescribe. You should be able to build sufficient patient/doctor rapport in order to counsel patients undergoing practical procedures and health promotion issues. You should have an appreciation of the role of the Doctor in the Health Service Team and also what will be expected of you when you start to work as an FY1. You should have an appreciation of the importance of communication skills with both patients and staff.

Information Booklet:

Please read and retain the information contained in this booklet as it contains details of your commitments during your attachment. Many opportunities for learning are contained in this information booklet which you will need to organise and it is up to you as to how you best use the facilities available in Forth Valley. The booklet also refers to important issues such as information security, infection control and guidelines for medical students. It is helpful to let us know before you leave exactly what you think of the student experience in Forth Valley, what works well and what you feel needs improvement. This will help to improve the experience of medical students that follow you.

Identity Cards:

Your University ID card must be worn at all times.

Student Concerns:

If you have any concerns whatever, patient safety, personal, learning, staff issues etc please tell your supervisor in the first instance or feel free to discuss with any of the Medical Education Undergraduate Team.

Student Concerns:

If you have any concerns whatever, patient safety, personal, learning, staff issues etc please tell your supervisor in the first instance or feel free to discuss with any of the Medical Education Undergraduate Team.

Undergraduate Team			
Name	Title	Extn.	Email
Dr Kate Patrick	Director of Medical Education (DME)	67399	kate.patrick@nhs.scot
Dr Chris Kelly	Deputy DME and UoG Sub Dean	66846	chris.kelly@nhs.scot
Dr Alasdair Cooper	Clinical Teaching Fellow (CTF)	67836	alasdair.cooper@nhs.scot
Dr Lucy McNally	Clinical Teaching Fellow (CTF)	67478	Lucy.McNally@nhs.scot
Margot Robinson	Undergraduate Co-ordinator	67619	margot.robinson@nhs.scot

Absences from Attachments:

Planned Absences:

Please note that any planned absence for your attachment must be approved in advance by your supervising Consultant. You should then notify Margot Robinson, the Forth Valley Undergraduate Co-ordinator who can be contacted on Extn. 67619 (direct line 01324 567619) or by email at margot.robinson@nhs.scot

Unplanned Absences:

If you are absent due to ill health you should telephone or e-mail Margot Robinson and your supervising Consultant's secretary as soon as possible. You should also observe your Universities absence reporting self certifying procedures.

You are required to sign in each morning, the sign-in sheet is on the table outside the Undergraduate office.

You are required to sign in each morning, the sign-in sheet is on the table outside the Undergraduate office.

Why is this important

Accurate information regarding your planned/unplanned absence is essential from a Health & Safety point of view as we need to be able to account for your whereabouts in the event of a hospital emergency.

Locker Key:

There are lockers available near the library and Undergraduate office at FVRH. Please ask the undergraduate co-ordinator for a key.

Swipe Card Access for FVRH:

Many areas in FVRH are only accessible by swipe card access, learning centre, theatres etc. Student swipe cards are available from the undergraduate co-ordinator. These cards also entitle you to staff discount in Starbucks

.

Accommodation:

Limited accommodation is provided on the FCH site in the Junior Doctors Residence. Do not give your room keys to anyone else and do not exchange rooms without the prior permission of the Accommodation Manager, Karen Nimmo, or ring "0" for the switchboard and ask them to page you a domestic supervisor if you have any problems with your accommodation. Cooking facilities are available in the residences.

Please take care of your room keys and at the end of your attachment leave the keys in your room and ensure the room is locked before leaving. If you do not return the key this may mean another student will not have accommodation at the start of their attachment.

Travel expenses, to the equivalent rate of the bus fare, will be paid to students preferring not to stay in the accommodation.

Parking:

If you have a car with you it can be easily parked at the Falkirk site. There is access to the overflow purple car park at Larbert where the barriers are always raised. We would ask you not to park in the front visitor's /patient car park at FVRH

Public Transport

For students who do not have their own transport Forth Valley will provide weekly vouchers for First Buses. There is a Number 38 bus which travels between Stirling and Falkirk and which calls at FVRH en-route. This service runs approximately every 15 minutes. When handing your voucher to the bus driver ask for a One Zone weekly ticket

Dining Facilities:**FVRH:**

The restaurant is open 7.30am to 7.30pm

Library/Computer Access:

The Library is situated on the 2nd Floor, above the restaurant at FVRH, within Clinical and Medical Education Services. Contact the Librarian, Elizabeth Carney, on 01324 567406 or email: fv-uhb.forthvalleylibraryservices@nhs.net

The library is manned Monday – Friday from 8.30am to 4.30pm. Access is available at all times using a valid swipe card.

Library Facilities

NHS Forth Valley Library Services provide free membership to medical students. The library stocks a range of books on the Knowledge Network, together with journals and educational resources which are available through the internet. There are many computers within the Library to facilitate access to the resources and study space where you can use your own device.

<http://nhsforthvalley.com/health-services/library-services/>

The Knowledge Network is NHS

Scotland's National eLibrary available from any computer at: <http://www.knowledge.scot.nhs.uk>

Among the wealth of resources, the Knowledge Network provides:

- Full text journal articles, abstracts and citations
- Electronic books
- Point of care resources including evidence summaries
- Assistance to enable users to keep up to date in their field of interest
- A wide range of apps
- Access to Library Search, the national catalogue Scottish Hospitals Library Catalogue

An Athens password is required to access NHS Scotland's Knowledge Network on-line resources. You can apply for an Athens password on line by visiting www.knowledge.scot.nhs.uk and clicking 'register' at the top right hand corner

Support is available to enable staff to develop their information and knowledge skills. Please call or email us if you would like to come along for a tutorial. Or if you have any questions.

A multi function device is available to facilitate printing, copying, scanning... Please note that a print code is required to use this device; codes will be provided together with your computer log-in.

The library has a portable DVD player as some volumes contain DVDs. When using the library please have respect for other users.

In FCH there is open wi-fi access available in the Junior Doctors Residence where you will be staying and Eduroam is available in FVRH.

Access to Clinical Systems

You will be given access to the following clinical systems whilst you are on placement:

Clinical Portal

Using your generic computer log-in

SCI Store

A username and password will be provided

HePMA

A username and password will be provided but you must complete a Turas Learn module in order to activate this, the module is called NHS FV HePMA View Only

TrakCare

A username and password will be provided but you must complete two Turas Learn modules in order to activate this as follows:

- NHS FV Introduction to TrakCare module
- NHS FV TrakCare Acute Inpatient Doctor module

We require you to undertake an additional Turas Learn module this is not a clinical system but an invaluable teaching tool

NHS FV ReSPECT

.

Lectures/Teaching:

Edinburgh 6th year Students will spend a total of 4 weeks in Forth Valley. During this time you will be on nights for one week and spend one weekend on acute receiving.

You should attend at least one out-patient clinic in each of the medical specialties ie. respiratory, cardiology, gastroenterology, endocrinology (or more if you wish). Consultants are agreeable to let you sit with them but only one student at a time. Occasionally if they are particularly busy they may suggest coming back another day.

You should also attend ward rounds, both acute receiving ward rounds and general ward rounds and not be afraid to ask questions. You should write up as many patients as possible and present them to Medical Staff and in particular make sure you present at least one case per week to your supervising Consultant. There will also be opportunities for you to attend ward rounds in Palliative Care with Dr Sarah Miller, Specialist Consultant in palliative care . The majority of teaching is currently delivered via Teams and all teaching sessions will be posted on the 'Events' section of the Medical Education website under Undergraduate

Undergraduate Medical Education Facilities:

FVRH:

The Library and computer room in FVRH are located on the second floor of F block, which is the round building at the front of the hospital, there is 24 hour access to the library and computer rooms, after hours they can only be accessed from the second floor ward corridor.

FCH:

There is open access to wi-fi in the Junior Doctors Residence

Postgraduate Teaching:

Should your timetable permit you are welcome to join via Teams the Foundation Year 1 and 2 Core Curriculum Programme the FY2 session is on Wednesday 12.30pm to 1.30pm. The FY1 session is on Thursday 12.30pm to 1.30pm. The sessions are held in the Learning Centre 3rd Floor Block F in FVRH and available via Teams

You may also wish to attend multi disciplinary team meetings.

TOPIC	DAY & TIME	VENUE
Skin	Every 2 nd & 4 th Tuesday 12.30pm	FVRH Seminar Room 6
Lung	Thursday 08.30am	FVRH Seminar Room 6
Haematology	Friday 09.00am	FVRH Seminar Room 4

Educational Supervisor:

You will be allocated an Educational Supervisor and a mentor at the start of your attachment. It is very important that you are proactive in maintaining regular contact with your supervisor in order that your assessment reflects your progress. Please try to attend his/her clinics once a week. Should the clinic time conflict with scheduled tutorials excuse yourself from teaching by contacting the undergraduate co-ordinator

Dress Code

University Scrubs should be worn at all times on the wards.

Paging/Bleeping

To bleep a doctor in dial 68100 and follow instructions. If you wish to contact a Doctor on the Stirling or Falkirk sites dial the SRI hospital switchboard on 01786 434000 and ask for the Doctor .

Format of General Medicine Attachment in Forth Valley:

During your attachment please base yourself in your Educational Supervisor's ward
All of the medicine Consultant's rotas include weeks when they are Consultant of the Week (CoW) this is the week that they will spend based on their home ward, as opposed to On-Call, front door etc. Please ascertain from your Educational Supervisor/Secretary which week(s) this will be during your attachment. It is important that you join your supervisor on the ward during that time. **Outwith these times you are free to attend other wards/departments/clinics, However should you wish to spend time on another ward please speak to the undergraduate co-ordinator to arrange this in order that there are the appropriate number of students on any given ward.**

This will help cover a lot of your ILOs and give you a rounded experience. If you are unsure how to do this email or speak to your clinical supervisor.

Key points for your attachment in Medicine:

Edinburgh Students do a 4 week attachment during those 4 weeks you will also be expected to do a week of nights and a weekend.

During your time on the wards you should attend Consultant ward rounds and present cases on these ward rounds. You can present cases with the Junior Staff but present at least one case per week to your supervising Consultant. You should also spend time with the Junior Doctors, learning ongoing management of the patients and also helping them with everyday tasks such

as venflons, blood gases, chasing and interpreting blood results, ECGs, writing cardexes (but not signing for drugs). This contribution to the team will be valuable experience for FY1.

At any one time you should be familiar with the total care and management of 2 or 3 patients in **your ward**. You should act as their FY1 Doctor as far as possible for writing in notes and ward rounds and writing cardexes (but not signing for drugs).

Out-Patient Clinics - opportunities for clinics are detailed in the timetables included in this pack and you can sign up to attend a clinic on the google spreadsheet, you will be given the links electronically to the spreadsheet at the outset of the attachment. You will be expected to attend at least 1 clinic (more if you wish) in each of the medical sub-specialities, ie. Respiratory, Cardiology, Endocrinology and Gastroenterology and Neurology. If you wish to attend please check with the consultant's secretary beforehand, as the clinics scheduled do not take account of the rota for on-call weeks, acute receiving weeks, ward weeks, annual leave, study leave etc. There should never been more than 1 Student in with a Consultant at any one time. Please note that clinics are sometimes cancelled if Consultants are away so you **need** to check in advance.

Assessment

1. Clinical skills

As before, tutors will provide an overall assessment of the student's performance, taking into account interactions with the student and the following:

- **Direct clinical observations** (formerly postcards)
 - Students will be expected to complete **2 direct clinical observations**. One should focus on history taking and one should focus on examination skills.
 - These should be observed with feedback provided in real time
- **Task-based assessments**
 - Students will be expected to complete **2 task-based assessments**.
 - This is a new style of assessment which focuses on how students perform important clinical tasks that they will be required to do as a new FY1. In medicine we will be focusing on the task of clerking in an acute admission. The idea is that after working with the student for a series of shifts (e.g. a on call/weekend) when they will have clerked in a variety of patients with a variety of complexities, you would make a global judgement of how much supervision you feel the student would need when clerking in a straightforward case going forward. You will note that this differs from existing workplace based assessments, like mini-CEX, in being longitudinal and contextualised.
 - You may be familiar with this assessment process which is already in use in the assistantship module. I will provide more guidance about this assessment process in due course.

2. Professionalism

- As before, professionalism forms an important part of the assessment process

3. Case Report (portfolio report)

- Portfolio case There will now be a **2000 word limit** (excluding any front cover and reference page). The report should be in the form of a **discharge OR handover letter**. Guidance for students will be available on Learn

- Section 1 should focus on the clinical aspects of the patient journey.
- Section 2 (discussion) should include a basic sciences section followed by a discussion of 2 programme themes directly relevant to the case.

During your time you should attend any investigations or interventions that you have not seen before or would like to have further experience of, eg. spend half a day in cardiac investigation seeing echos etc, see CT scans, CT guided biopsies, bronchoscopies, endoscopies etc. Also attend specialist clinics or many of the other opportunities available to you and you will find invaluable. The Day Medicine department in Ambulatory Care is a goldmine for observing and helping with many procedures.

Teaching - see timetable

Professional Behaviour - You are expected to be available 9am to 5pm (or hours as timetable) on a daily basis. Your behaviour on the wards should be as it is to be employed as an FY1. If you need time off please arrange as above.

Assessment:

Your supervisor will conduct an end of block assessment with you and fill out the assessment.

Your portfolio case should be uploaded to PebblePad and a ticket sent to your supervisor.

Additional Learning Opportunities:

Neurology Teaching:

Neurology teaching is by arrangement with Dr Malcolm Macleod, Consultant Neurologist.

Clinical Skills Practical Teaching Sessions:

If you wish to have any practical clinical skills sessions as follows:

Venepuncture
Blood Cultures
Cannulation
Male & Female Urinary Catheterisation
ABG sampling

Please contact Sharon Faulds, Senior Nurse in Practice Development on
Mobile 07827820338

Rheumatology:

Specialist Nurse Led Clinics:

- Rheumatology Clinic Tuesday 9.00am in SRI Area 2 – Alternate weeks
Rheumatology Clinic Wednesday 2.00pm in FVRH Area 3
– Alternate weeks

If you wish to participate in a clinic contact Nurse Davies, Rheumatology Nurse Specialist on
FVRH 01324 566331

- Biologics Clinic Monday 9.00am in FVRH Area 3 – Alternate Weeks
Biologics Clinic Tuesday 9.00am in SRI Area 2 – Alternate Weeks

If you wish to participate in a clinic contact Nurse Menzies, Biologics Nurse Specialist (Nurse Menzies is currently on maternity leave. Clinics can be arranged through Nurse Davies, contact details above.

Microbiology:

If you wish to be given microbiology teaching please contact Dr Ben Cooke, Consultant in Medical Microbiology on Extension 66678

Prescribing:

To undertake any teaching in prescribing please contact Clare Colligan, Antimicrobial Pharmacist on Extension 66721

Alcohol Abuse:

If you would like some teaching on this subject please contact Susan Gilfillan or Jennifer Berry our Alcohol Liaison Nurses on 66321

Cardiac:

If you would like to have any teaching in this area please contact Catherine Mondoia, Consultant Nurse in Cardiology on Extension 66979

Respiratory:

If you wish to have any teaching please contact Olwyn Lamont the Respiratory Lead Nurse Specialist on Extension 66618

Dermatology:

If you would like to attend any of the dermatology clinics and treatments please contact Brenda Smith, Dermatology Lead Nurse on SRI Extension 4098

Diabetes:

There are several Nurse/AHP led clinics /sessions per week Contact the diabetes Nurse on Extension 66929

Occupational Therapy:

Contact Rosina McGuire, the Deputy Head of Occupational Therapy, on FVRH 01324 567435 or page 1526, if you wish to spend any time on the wards with an occupational therapist.

Haematology

You are welcome to join the Haematology Team for ward rounds and out patient clinics, the outpatient clinics are included in Clinic Lists in this induction pack. Ward rounds are on Monday at 13.30, Wednesday at 9.30 and Friday at 11.00 all of them are in Ward A12. Contact any of the Haematology consultants Dr Brammer, Dr Hughes or Dr Nielson, through their secretary Karen Rafferty on Extension 67084. You are also welcome to attend the Haematology MDT meeting. This is held at 9am each Friday in Seminar Room 9 adjacent to Ward B31.

Phlebotomy

You are welcome to join the phlebotomists and practise your blood taking skills. Contact Lainy Weir on page 1972

Weekend Shift

Arrange with your consultant or his team which weekend to work and only work three weekdays during that week.

When working nights or weekends results in you missing any scheduled tutorials please advise the undergraduate co-ordinator that you will not be attending. This will avoid your being marked as absent.
